

AQUASERMO®
FLUID IMAGE TECHNOLOGY

Aquasermo is a promotional miracle!

A truly unique fully-automated water graphics display system that harnesses precision control of water droplets to create words and images in mid-air within a cascading wall of water. Aquasermo can display any graphic, logo, word or message.

The effect is astonishing. And the effect on people who've seen it is more astonishing still.

AQUASERMO®
FLUID IMAGE TECHNOLOGY

Aquasermo's flow of water quite literally stops the flow of traffic and creates an instant captive audience.

So, if your promotional message is not getting through, it will now. Because, with Aquasermo, once seen it's never forgotten.

Aquasermo creates a jaw-dropping focal point, and major talking point, for exhibitions, reception areas, conferences, product launches, branding, retail installations, celebrity parties, shopping malls, entertainment and leisure venues.

Just as it did at David Beckham's first game for LA Galaxy and a recent garden party for Prince Charles' Start Initiative.

Aquasermo comes in a range of sizes from 1 to 50 metres and is quick and easy to install.

And Aquasermo's not just a pretty face. Because the attention that Aquasermo will attract for your message means something even more important.

New income streams. And a great return on investment.
